Grade 2 - Mathematics

#### **Lesson Details**

Grade Level: 2	Curriculum Links:	Mathematics	Time Needed:	40 minutes – 1 hour	
Learning Goal	To practice basic number sense and numeration skills. As well as counting, using tools				
	(ping pong balls), and relating story to real-world contexts (turtle nest protection).				
Success Criteria	By the end of this lesson, students will have practiced counting by 1s, 2s, and 5s using				
	tools, practiced writing out numbers as words, and learned the importance of				
	protecting turtle nests.				
Specific	Number Sense and Nur	neration			
Expectations	<ul> <li>Represent, compare, and order whole numbers to 100, using a variety of tools</li> </ul>				
	and contexts;				
	<ul> <li>Read and print words as whole numbers to 20, using meaningful contexts;</li> </ul>				
	Determine, using concrete numbers, the 10 that is the nearest to a given two-				
	digit number, and justify the answer;				
		s involving the addition of mental strategies;	n and subtraction o	f whole numbers to 18,	
		<u> </u>	ntities by using who	le-number addition and	
	subtraction;	onompo ocemeen quar	thices by doing time	ie namber addition and	
	•	involving the addition	n and subtraction o	f two-digit numbers,	
	•	ut regrouping, using c			
Materials	Worksheet (attached),			nd (optional), 10 Egg	
Needed	Cartons (optional), Turi	tle Cut-Outs (attached	) or a Turtle Stuffed	d Animal, Fox Cut-Outs	
	(attached) or a Fox Stu	ffed Animal.			

#### **Lesson Description**

Overview	Using turtle eggs (ping pong balls) found in a turtle nest (sandbox or other container)		
	students will practice adding and subtracting by counting the number of eggs in the		
	bucket before and after a fox eats some eggs.		
Activity	<ol> <li>Split your classroom into 2 groups, giving each group a nest of up to 50 eggs (ping pong balls). These eggs can be buried in sand like a real nest, so the children can extract them, or placed in a bucket without sand. Hand out 5 egg cartons as well for students to place their eggs in as they discover them in the bucket.</li> <li>Begin by explaining that turtles are a species at risk, and one of the things harming their population is predation of nests by foxes, skunks, and racoons.</li> <li>Using the turtle cut-out (or stuffed animal), set the story that our turtle has just laid a nest of eggs.</li> <li>In supervised groups, each group must count how many eggs are in each nest.</li> </ol>		
	<ul> <li>First, counting by 1s, then 2s, then 5s making visual piles of eggs if needed.</li> <li>5. Using the attached worksheet, the students will write down the number of eggs found and use their numeration skills to solve problems.</li> <li>6. Using the fox cut-out (or stuffed animal), set the story that a predator has come around to eat 20 eggs. Have the groups count to 20 and remove those eggs – you can also have the students practice counting backwards from 20 instead.</li> <li>7. Bring the class back together as one group, and have the students add the two predated nest numbers together.</li> </ul>		

### **Lesson Description**

	O. Fuel by discussing house, and halo greatest trouble constitutes and frame and delice.
	8. End by discussing how we can help protect turtle eggs from predation.
Background Information	The Common Snapping Turtle is the largest freshwater turtle in Ontario. In the spring, female snapping turtles venture out of the water to find suitable locations to nest. This often occurs on sandy banks, or within the gravel on roadsides. This is a very vulnerable time for laying snappers, as they are exposed cars which can harm them. After the nests are laid, predators smell the freshly laid eggs and might dig into the nest eating some or all of the eggs.  To help protect turtle nests from predation, nests can be protected with a cage. If nests cannot be caged (on a road, driveway, etc.) you can call the Turtle Guardians hotline (found on the Turtle Guardians website <a href="https://www.turtleguardians.com/contact/">https://www.turtleguardians.com/contact/</a> ). In certain areas of Ontario, Trained Conservation Technicians may come to the turtle nest and collect the eggs to be incubated. Turtle eggs will incubate for at least 60 – 90 days before they hatch – and if in the care of a technician, they will return the baby turtle to where they were originally found.
Blacklist Masters	<ul> <li>Worksheet (attached)</li> <li>Turtle and Fox Cut-Outs (attached)</li> <li>Video Link(s): <u>Turtle Nesting</u></li> <li>For more information, please visit <a href="https://www.turtleguardians.com/turtle-nesting/">https://www.turtleguardians.com/turtle-nesting/</a></li> </ul>
Place-Based	Learning as a group in the classroom, or outside in a field with sand/gravel access as
Learning	turtle nests are known to occur where there are sand and gravel deposits. Students will
	become Turtle Guardians themselves as they investigate a turtle nest and gain real life
	experience learning how to help the eggs.
Inquiry Based	Using <b>Guided Inquiry</b> , the students will work together in their groups to count the
Learning	number of eggs before and after the fox eats some.
	Ask the students:  How can we help protect turtle eggs from being eaten by predators like the fox?  Have you ever seen a nesting turtle at the side of the road or near your home?
Turtle Stories	Have you ever seen a turtle nesting, or a predated nest? Next time take a picture and share it with us. Try building a nest cage protector for the next time you see a turtle nest. Students are encouraged to share their experiences, pictures, and worksheets on the Turtle Stories website, found here: <a href="https://www.turtlestories.ca/">https://www.turtlestories.ca/</a>
Turtle Guardian	After completing Level 1 (Ontario Turtle Identification) of the Turtle Guardian Program,
Program Links	students can move onto <b>Level 2</b> (Wetland Watchers). In this level the students learn the
	importance of protecting, and how to protect turtle nests. They then can become
	official nest sitters (when accompanied by an adult) and learn how to build a nest cage
	protector. For more information, please visit <a href="https://www.turtleguardians.com/what-is-a-turtle-guardian/">https://www.turtleguardians.com/what-is-a-turtle-guardian/</a>

### My Notes

Grade 2 – Mathematics

**Turtle and Fox Cut-Outs** 

1

Wow! You've just found a turtle nest!

There are \_\_\_\_50\_\_ turtle eggs in my nest.

Write this number in words:

**Fifty** 

Oh no! A fox came around and ate 20 of your eggs. How many eggs do you have now?

There are \_\_30\_ turtle eggs in my nest.

Join another group. Can you add your turtle egg number to the other group?

There are <u>60</u> turtle eggs in our nest.

Did you know that Common Snapping Turtles can lay about 50 eggs? And each egg looks like a ping pong ball, just like what you're counting today!

2

If you have 26 eggs in a nest, what is the nearest 10?

30

Write this number in words:

**Thirty** 

4

Can you **draw** the turtle eggs that are in your nest?

How can we help protect turtles from predators like foxes?

- Cover nest with a cage
- Call a Turtle Guardian or Trained Conservation Technician

7 A Snapping Turtle has laid 13 eggs. Nearby, another turtle has laid 5 eggs. How many eggs are there in <u>total</u>?

Draw the eggs below to help you with your math.

$$13 + 5 = 18 \text{ eggs}$$

8 A Painted Turtle laid 15 eggs, but a fox came along and ate 10 eggs.

How many eggs are <u>left</u>?

$$15 - 10 = 5$$
 eggs

**9** Eastern Musk Turtle's lay fewer eggs than other turtle species. 3 different Musk Turtles laid 3 eggs each.

Use <u>multiplication</u> to find out how many eggs there are in total.

$$3 X 3 = 9 eggs$$

10 There is a total of 12 eggs. 4 Snapping Turtles laid nests, each with equal amounts of eggs.

How many eggs did each turtle lay? Use <u>division</u> to find out.

$$12 \div 4 = 3 \text{ eggs}$$

1

Wow! You've just found a turtle nest!

There are \_\_\_\_\_ turtle eggs in my nest.

Write this number in words:

Oh no! A fox came around and ate 20 of your eggs. How many eggs do you have now?

\_\_\_\_ = \_\_\_\_

There are \_\_\_\_\_turtle eggs in my nest.

Join another group. Can you add your turtle egg number to the other group?

\_\_\_\_ + \_\_\_ = \_\_\_\_

There are \_\_\_\_\_turtle eggs in our nest.

Did you know that Common Snapping Turtles can lay about 50 eggs? And each egg looks like a ping pong ball, just like what you're counting today!

2

If you have 26 eggs in a nest, what is the nearest 10?

Write this number in words:

4

Can you **draw** the turtle eggs that are in your nest?

6

How can we help protect turtles from predators like foxes?

7 A Snapping Turtle has laid 13 eggs. Nearby, another turtle has laid 5 eggs. How many eggs are there in total?
Draw the eggs below to help you with your math.

8 A Painted Turtle laid 15 eggs, but a fox came along and ate 10 eggs.

How many eggs are <u>left</u>?

Eastern Musk Turtle's lay fewer eggs than other turtle species. 3 different Musk Turtles laid 3 eggs each.	
Use <u>multiplication</u> to find out how many eggs there are in total.	
There is a total of 12 eggs. 4 Snapping Turtles laid nests, each with equal amounts of eggs.	
How many eggs did each turtle lay? Use <u>division</u> to find out.
